

# RMS ENERGY

ENERGIZING THE FUTURE THROUGH RELIABLE POWER SOLUTIONS

RMS Energy is a nationwide engineering, service and construction firm that aids utility, industrial, and institutional facilities in achieving peak efficiency through comprehensive solutions in isolated phase, non-seg and cable bus systems, switchgear, substations, transformers, relays, commissioning, testing, engineering, professional services and more. When it comes to the reliability and operation of an electrical system, RMS Energy strives to be your single resource partner.

PROFESSIONAL SERVICES

# SOLUTIONS OVERVIEW

## BUS SOLUTIONS (ISOLATED PHASE, CABLE, NON-SEGREGATED)

*Complete services for isolated phase, non-seg and cable bus duct systems.*

- ⚡ Greenfield installation
- ⚡ Modifications / Retrofits
- ⚡ Inspection, maintenance and repairs
- ⚡ Parts supply
- ⚡ Design engineering and studies

Thermal scanning of critical power equipment is available.

Bus solutions include installations, modifications and retrofits

## TRANSFORMER SOLUTIONS

*Comprehensive solutions in transformer installations, maintenance and testing.*

- ⚡ Repair and maintenance
- ⚡ Installation
- ⚡ Dress and test
- ⚡ Oil processing, vacuum fill
- ⚡ Electrical testing
- ⚡ Condition assessment

Repairs and maintenance can be performed on any OEM transformer.

A full range of transformer solutions is available from our experienced teams.

## EMERGENCY SERVICES

**On call 24X7 for when the unexpected arises.**

**1-888-683-3630**

# SOLUTIONS OVERVIEW

## FIELD / COMMISSIONING SERVICES

*Full service installation, maintenance, repair and commissioning services.*

- ⚡ Installation inspections
- ⚡ Maintenance and acceptance testing
- ⚡ Equipment Repairs / Retrofits / Upgrades / Parts
- ⚡ HV substation apparatus acceptance commissioning
- ⚡ Protection and Control commissioning
  - Transmission
  - Substation
- ⚡ NERC Compliance
- ⚡ Utility integration
- ⚡ SCADA

Services include substation apparatus and Protection and Control commissioning.

Field work is conducted by experienced teams coast to coast.

## ENGINEERING SOLUTIONS

*Advanced engineering solutions create safe, reliable and redundant power systems.*

- ⚡ Protection and Control
- ⚡ New system design
- ⚡ Substation design
- ⚡ Retrofit design
- ⚡ Arc flash and coordination
- ⚡ Certified energy management
- ⚡ SCADA design

Engineering solutions include system designs and retrofits.

Our services focus on building reliability and redundancy for critical power systems.

# SOLUTIONS OVERVIEW

## PROFESSIONAL SERVICES

Complete professional services that include program and material management, constructability review services and more.

- ⚡ Program management oversight
- ⚡ Field safety representatives
- ⚡ Material management, logistic coordination
- ⚡ Owners' representative oversight
- ⚡ Constructability review services for transmission, distribution, substation, battery storage, and transmission / distribution underground
- ⚡ Budgetary cost estimating for projects, gradework, civil, electrical, transmission, distribution, industrial, commercial, underground
- ⚡ Construction management
- ⚡ Document control
- ⚡ Scheduler/ cost control analysis
- ⚡ Field construction coordinators
- ⚡ Field environmental monitors
- ⚡ Project planning

Professional Services include material management and logistical coordination.

We provide the right level of professional management services for your project and for your ongoing needs.

We provide review services for above and below ground transmission and distribution, substations and battery storage.
