

ANNOUNCING A NEW FIELD OFFICE LOCATION!

RMS Energy is excited to announce the opening of a new location just west of Charlotte, North Carolina, in Gastonia.

This strategic expansion strengthens our ability to serve utility, commercial and industrial clients across the Carolinas and Southeast with our comprehensive service offerings which includes:

- **Transformer Services** – Installation, repair, oil processing, and testing for all OEM types
- **Breaker & Switchgear Services** – Retrofits, modernizations, and 24/7 emergency support
- **Field Services** – Acceptance testing, maintenance, protection & control, SCADA support
- **Bus Duct Services** – Full lifecycle support from engineering and installation to repairs and retrofits
- **Engineering & Design** – Arc flash studies, relay upgrades, and equipment life extension
- **Substation Services** – Turnkey greenfield installations, civil/site work, and emergency response
- **T&D Engineering & Consulting** – Interconnection studies, NERC compliance, and system modeling from 480V up to 765kV systems

This move positions RMS Energy to meet the growing demand for power reliability, renewable integration, and aging infrastructure support in a region defined by rapid growth and change. Our local presence also improves response time for planned and emergency projects alike.

The new Gastonia office is led by a highly experienced team:

- **Eddie Ledford**, specializing in high-voltage field services and breaker systems
- **David Frasier**, overseeing transformer service operations
- **Fred Thornton**, supporting engineering and system optimization initiatives

Together, they bring decades of experience and deep knowledge of the regional power landscape. We're proud to plant a flag in the Carolinas and to expand our mission of energizing the future with integrity, safety, agility, and teamwork.
