

Revolutionize Your Inspection Process

RMS Energy can help you make solid decisions ahead of scheduled outages with non-invasive inspections using the IPB Robot Inspection Tool.

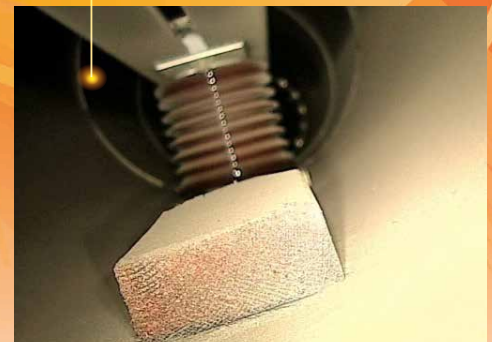

- ⚙ Low-cost, high precision
- ⚙ Anticipate repairs necessary for short outage windows
- ⚙ Reach limited accessibility points

Detect braids deterioration

See where bellows cracks are forming

Detect unwanted debris

Count on the technical expertise of RMS Energy and the IPB Robot Inspection Tool: The ultimate solution for automated, high-precision inspections in industrial environments.

This cutting-edge robotic system ensures your operations stay ahead of the curve—saving time, reducing costs, and enhancing safety.

- ⚙ Pinpoint accuracy, detecting defects as small as 0.1mm.
- ⚙ Protect workers from hazardous zones, confined spaces, high-risk areas, or extreme conditions
