

POWER GENERATION

RMS Energy's advanced engineering solutions will take your power distribution system reliability to a new level. With our years of experience and effective technology applications, our engineering team services the power solutions of customers large and small, nationwide. Our main goal is to create safe and reliable systems with appropriate redundancy to meet your power system requirements.

Compliance Services

- ⚡ NERC Standards
- ⚡ PRC-005 Maintenance Testing
- ⚡ PRC Compliance Studies
- ⚡ MOD Testing and Verification
- ⚡ NETA Equipment Testing
- ⚡ Transformers and Breakers

Owner's Engineer Services / Providing Engineering Expertise

- ⚡ Staff augmentation with knowledgeable Engineering Services for every power generator.
- ⚡ NERC Auditing and Maintenance Planning
- ⚡ Incident Investigation and Root Cause Analysis
- ⚡ Life Cycle Improvement Planning Facility Interconnection
- ⚡ Support, Including Distributed Resources

Relay Lifecycle

RMS has the capability to perform turn key installations of all relays. Generator and Line Relay settings can be converted and made to be NERC compliant.

- ⚡ Generator Relays Settings and Installation
- ⚡ Transmission Line Relays
- ⚡ Automatic Transfer Schemes
- ⚡ Arc Flash Reduction Systems
- ⚡ Motor Relays

Transformer, Bus and Switchgear Services

RMS can offer maintenance required for a power generation facility including Transformer and Isophase bus

- ⚡ Transformer Testing and Maintenance
- ⚡ Isophase Bus Design and Replacement
- ⚡ Non-Seg Bus Design and Replacement
- ⚡ Switchgear Retro-Fills
